Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. According to a preliminary amendment filed on June 13, 2006, the applicants have canceled claims 1-22 and furthermore, have added new claims 23-35.
2. Claims 23-35 are now pending in the application.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 23-35 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 23-35, the term ----characterized in that ---- is vague. The applicants are suggested to use the term --- wherein ----.

In claims 23-35, the term --- The method of manufacturing --- is vague. The applicants are suggested to use the term --- A process for the preparation ---- in claim 23 and then change the term ---method --- to ---process --- in claims 24-35.

In claim 23, the term ----7-ethyl-1,2,6,7-terahydrocamptothecin ---- should read as ---7-ethyl-1,2,6,7-tetrahydrocamptothecin ----.

In claim 27, line 2, the term --sulfoxid --- should read as ---sulfoxide ---.

Claims 30-32 depend upon claims which have been canceled by the preliminary amendment. An appropriate correction is required.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

7. Claims 23-35 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lin (U.S. Patent 7,151,179, cited on applicant's form 1449).

Lin discloses a process for the preparation of 7-ethyl-10-hydroxy-camptothecin. The process described by Lin (see col. 4, lines 7-50) meets all the limitations of instant claims except that Lin carries oxidation at a temperature below 10 degree C instead of 15-30 degree C. However, the temperature does not seem to be critical since the process of Lin produces 7-ethyl-10-hydroxy-camptothecin in high yield (90%) unless applicants provide unexpected results of superior yield of their process as compared to the process of Lin.
